

# ONC 2022 Updates

Steven Posnack, Deputy National Coordinator

# Office of the National Coordinator for Health IT

- Founded in 2004 by executive order, established in statute in 2009
- ONC is charged with formulating the federal government's health IT strategy to advance national goals for better and safer health care through an interoperable nationwide health IT infrastructure

## Laying the foundation of EHRs across the industry

- \$40B CMS investment to subsidize EHRs for hospitals and ambulatory providers
- ONC "certification" for health IT systems

## Leveraging EHRs to drive value

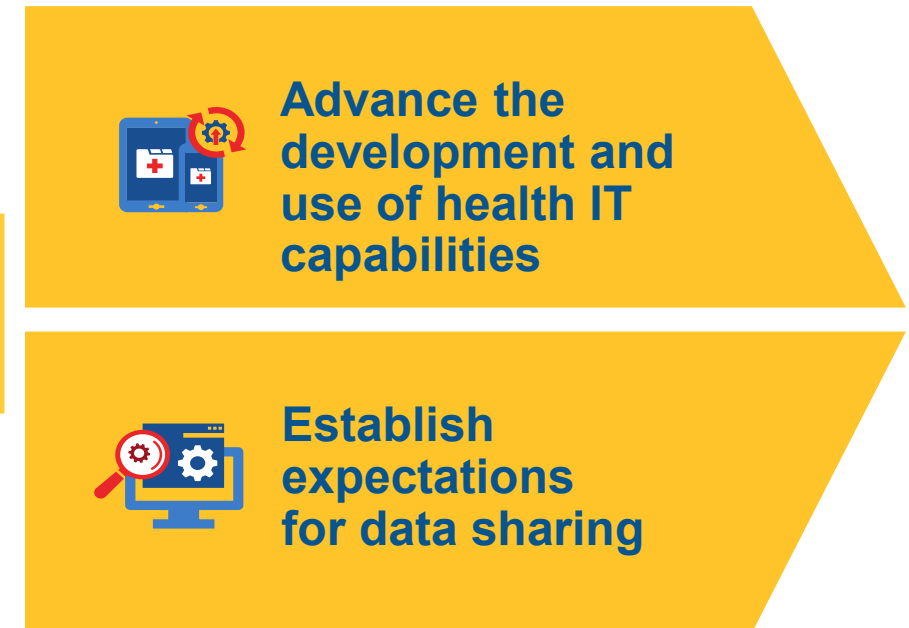

- Defines "information blocking" (practices that prevent, discourage, or interfere with access, exchange, or use of electronic health information)
- Requires access to information through APIs "without special effort"
- Requires nationwide governance for health information exchange networks – Trusted Exchange Framework and Common Agreement

# ONC Activities & Objectives

## ONC Activities

## ONC Objectives

## What ONC's Focused On

1. COVID response – support transition to modern public health infrastructure integrated with clinical care system
2. Accelerate adoption of open APIs and evolution of competitive digital health ecosystem
3. Connect and expand health information exchange networks to support providers, payers, public health agencies, researchers, and patients
4. Establish health equity by design model for embedding equity considerations in health IT design, implementation, and use
5. Align federal agencies' health IT activities to use federal market presence to bolster national health IT goals

## Timeline to Operationalize TEFCA

### Summer/Fall/Winter 2021

- Public engagement webinars.
- Common Agreement Work Group sessions.
- RCE and ONC use feedback to finalize Common Agreement V1 and QHIN Technical Framework (QTF) V1.

### Calendar Q1 of 2022

- Release Final Trusted Exchange Framework, Common Agreement V1 Final, and QTF V1 Final.

### During 2022

- QHINs begin signing Common Agreement.
- QHINs selected, onboarded, and begin sharing data on rolling basis.

- There are specific, but important, use cases that require consistency and alignment on datasets that go beyond the USCDI
- Launched USCDI+ as a new initiative to support the identification and establishment of domain or program-specific datasets that will operate as extensions to the existing USCDI
- USCDI+ is a service that ONC will provide to federal partners who have a need to establish, harmonize, and advance the use of interoperable datasets that extend beyond the core data in the USCDI in order to meet agency-specific programmatic requirements
- USCDI+ efforts for quality measurement and public health are just getting underway with our CMS and CDC partners

# Cures Act Final Rule Applicability, Compliance, and Comply-By Dates

## Information Blocking

EHI = Electronic Health Information

USCDI = United States Core Data for Interoperability

# What's to come: Standards Advancement, Modernization, and Coordination

- USCDI v3 draft and Interoperability Standards Advisory <https://www.healthit.gov/isa>
- RFI on prior authorization
- New Proposed Rule (Certification/TEFCA/Info Sharing)
- SDO collaboration
  - Putting Project US@ address specification into practice
- LEAP in health IT
  - <https://www.healthit.gov/topic/leading-edge-acceleration-projects-leap-health-information-technology-health-it>
  - University of Texas at Austin project --enabled Social and Health Information Platform to integrate a closed-loop social services referral system accessible through the electronic health records (EHRs) maintained and used by Federally Qualified Health Centers (FQHCs)
  - Children's Hospital Corporation, in collaboration with Yale University and Yale-New Haven Health, aims to develop a platform based on Health Level Seven International® (HL7®) Fast Healthcare Interoperability Resources® (FHIR®) that leverages bulk data to support an ecosystem for research and learning, called Cumulus.
